Summary

I am a dedicated third-year Computer Science and Engineering student at ITER with a strong foundation in programming, machine learning, and communication skills. Experienced in Java, C/C++, Python, Dart/Flutter, HTML, CSS, JavaScript, and basic knowledge of TensorFlow, OpenCV, and SQL. I thrive on solving challenges and have contributed to projects like an action detection system and a personal portfolio website.

Education

ITER, SOA DEEMED UNIVERSITY

B.Tech in Computer Science and Engineering, CGPA: 9.35 (2022 - Present)

Holy Cross School, Bokaro Steel City

CBSE 10th: 86.5% (2020)

CBSE (PCM) 10+2: 85% (2022)

Experience

Self-Employed Project Developer

Independent

- Developed an action detection system using Python, leveraging LSTM networks for sequence prediction.
- Implemented machine learning models with TensorFlow to accurately detect and classify actions.
- Ranked among the top 30 out of 100+ teams at the college level in the Smart India Hackathon.

Projects

Cryonics: AI-powered Infant Care System 🧠

Feb 2025 - Present

- Engineered an AI-driven infant monitoring system capable of identifying cry types and potential health concerns.
- Integrated early detection algorithms for autism and cerebral palsy to facilitate timely intervention.
- Developed a chatbot interface to provide real-time parental guidance and healthcare recommendations.

Portfolio Website 📄

Oct 2023

- Designed and deployed a fully responsive portfolio website optimized for cross-device compatibility.
- Implemented a dynamic theme-switching feature with light and dark mode options.

Sign Sense: Indian Sign Language to Text/Speech 🗣️

Aug 2024

- Developed an AI-powered system to translate Indian Sign Language into text and speech with 90% accuracy.
- Utilized deep learning techniques with LSTMs, TensorFlow, MediaPipe Holistic, and OpenCV for real-time gesture recognition.

Event Ease: Ticketing System (In Progress)

Jan 2025 - Present

- Developed an event ticketing system for seamless ticket generation and automated email distribution.
- Integrated a Flutter-based mobile app to enable QR code scanning and real-time authentication.

Certifications

Google Cybersecurity Professional Certificate

- Gained expertise in network security, endpoint protection, and risk management.
- Developed hands-on experience with security frameworks and incident response.

PwC Launchpad (In Progress)

- Developing industry-relevant skills in business analytics, consulting, and emerging technologies.

Skills

Programming Languages: Java, Python, C/C++, Dart, SQL

Technologies/Frameworks: HTML5, CSS3, Javascript, Flask, MongoDB, Mediapipe, OpenCV, TensorFlow

Developer Tools: Git/GitHub, VS Code, Linux, Figma, Canva

Soft Skills: Strong Communication, Interpersonal skills, Adaptability, Creativity
